

S / No	Name of School	Title of Poster	Subject Area
1	St. Joseph's Institution	Investigating the effect of surface wettability on water evaporation rates.	Physics
2	Crescent Girls' School	Investigating the Impact of Different Proportions of Food Waste Compost on Ocimum Basilicum	Biology
3	Temasek Junior College	Mechanical Robotic Gripper Design for Food Handling	Physics
4	Nanyang Girls' High School	Surface modification of cellulose-based haemostatic sponge to improve surgical outcome	Biology
5	CHIJ St Nicholas Girls' School	Sustainable solution to waste removal using a fleet of waste removal trucks	Computing
6	Zhonghua Secondary School	The Rapunzel Project: An Experimental Study on the Effects of Selected Chemical Compounds on Hair Growth Rate	Biology
7	Raffles Institution	Asymmetric synthesis of ortho-substituted sulfoxide through ionic interactions	Chemistry
8	Dunman High School	Evaluation the effectiveness of spinach extract as a photosensitizer	Chemistry/Biology
9	Methodist Girls' School (Secondary)	Testing the Efficacy of Citrus Oils on Bacteria, in the context of Hand Sanitiser	Biology
10	Hwa Chong Institution	Investigating the effects of plant extracts on oxidative stress in yeast	Biology
11	Nan Chiau High School	Investigating the Effect of Biochar Made from Rice Waste on Soil Fertility	Biology/Chemistry
12	River Valley High School	Smart Wearable for ECG Monitoring	Physics
13	Anglican High School	Using Daphnia in Bioassay in Biomonitoring Studies	Biology
14	School of Science and Technology, Singapore	Measurements of the speeds of the various regions in the Milky Way Galaxy using a parabolic grid dish antenna	Physics
15	NUS High School of Math and Science	SEmuRAI: Development of a Software Emulation and Reversing AI Agent for Dynamic Binary Analysis (cs)	Computing
16	NUS High School of Math and Science	Multicilin Redundancy in the Zebrafish MCC Programme due to Evolutionary Divergence	Computing/Biology
17	National Junior College	Investigation of Different Mediators for the Cathodic Chamber in Microbial Fuel Cell	Chemistry
18	Nanyang Girls' High School	Synthesis of silver-coated magnetic iron oxide particles for methylene blue removal	Chemistry
19	National Junior College	Turning Corn Cobs into Water Cleaners: A Regenerable Cellulose Approach to remove Carbamazepine	Chemistry
20	National Junior College	Evaluating Escherichia coli's Antimicrobial Resistance Towards Ursolic Acid in Fermented Fruit Peels Over Two Generation	Biology
21	Raffles Girls' School	Lactobacillus as an effective treatment to ameliorate locomotive decline in Drosophila melanogaster model of Alzheimer's Disease	Biology
22	Korea Science Academy of KAIST	Condition Optimization of NO ₂ RR through Size-Controlled Cu ₂ O Nanocubes Synthesized at Varied Temperatures	Chemistry
23	National Gifted Secondary School of Laos	Harvesting Electricity from Speed Bumps	Physics
24	Philippine Science High School Main Campus	In Silico Screening of Pandanamine Isolated from Pandanus amaryllifolius and Its Analogues as Potential Human Acetylcholinesterase Inhibitors	Chemistry
25	Taipei Municipal Chien Kuo High School	Metal-Organic Frameworks for the Colorimetric Detection of Alkaline Phosphatase, Coupled Vibrational Dynamics of Fluids and Accelerated Containers	Physics/Biology
26	Taipei First Girls High School	Student1: Identification and Functional Analysis of Lipid Droplet Autophagy Receptors. Student2: Liquid-Liquid Phase Separation of C9orf72 Dipeptide Repeats related to A	Biology
27	Tallinn Secondary School of Science	Investigation of the aerodynamics of paper airplanes and the physical properties of HDPE	Chemistry/Physics
28	Diocesan Girls' School	Investigation on dye absorption properties of alginate-based hydrogel beads	Chemistry
29	Kamnoetvidya Science Academy	The in-silico design of novel extremely flexible boron-oxide zeolitic frameworks — a boron chemistry challenge	Chemistry
30	SMJK Chung Ling High School	Leaf Guard	Computing
31	SMA Negeri 4 Denpasar	Decrease the Impact of Disease with Biological Product	Biology/Mathematics/Computing
32	The Angkor Intellectual Academy	How can AI help in operating levers?	Physics
33	Center for Young Scientists	Utilizing Sonar and Machine Learning to Detect Objects Underwater	Physics
34	Staples High School	Discovering Novel Targets for the FMN Riboswitch to Test the Utility of Computational RNA-folding Methods for Antibiotic Development	Biology
35	HUS High school for Gifted Students	Facile synthesis of Ag nanostructures for detection of trace thiram	Physics
36	The Second High School Attached to Beijing Normal University, International Division	Optical Microcavity Sensing: Detection of Phosphate Buffered Saline Solutions at Various Concentrations Using a Microbubble Resonator Integrated with Microfluidics	Physics
37	The Second High School Attached to Beijing Normal University, International Division	Aberation Strategies Across Focal Lengths: A Simulation-Based Study of Three Lens Types	Physics
38	Mahdoli Wittayanusorn School	The Development of Saliva Substitutes with Dentin Remineralizing and Antibiofilm Properties for Xerostomia Patients	Biology
39	ntreE for the Development of Gifted and Talented Education (EDGE), Ministry of Education, Brunei Darussalam	***Will inform the ISYF Committee on a later date	ysics/Chemistry/Biology/Mathematics
40	Hyogo Prefectural Takarazukakita High School	Development of a Solidified Rechargeable Cell Using Natural Polysaccharides	Chemistry
41	New Generation School of Preah Sisowath High School	Gene Therapy and the Role of Bacteriophages in Genetic Research	Biology
42	Camborne Science & International Academy	What are differences in trajectory for a new rocket with CNTP	Physics
