

S / No	Name of School	Title of Poster	Subject Area
1	Anglican High School	Using Daphnia in Bioassay in Biomonitoring Studies	Biology
2	Camborne Science & International Academy	How YOU could escape to Mars in 2026 using an optimal Trajectory (it's not rocket science!)	Physics
3	Center for Young Scientists	Utilizing Sonar and Machine Learning to Detect Objects Underwater	Physics
4	CentrE for the Development of Gifted and Talented Education	An investigation into AI-Based Optimisation of F1 Front Wing Geometry for Drag Reduction	Physics;Chemistry;Biology;Mathematics
5	CHIJ St Nicholas Girls' School	Sustainable solution to waste removal using a fleet of waste removal trucks	Computing
6	Crescent Girls' School	Investigating the Impact of Different Proportions of Food Waste Compost on Ocimum Basilicum	Biology
7	Diocesan Girls' School	Investigation on dye absorption properties of alginate-based hydrogel beads	Chemistry
8	Dunman High School	Biofilm and viability suppression of Serratia marcescens via photodynamic treatment using natural compounds	Chemistry;Biology
9	HUS High school for Gifted Students	Facile synthesis of Ag nanostructures for detection of trace thiram	Physics
10	Hwa Chong Institution	Investigation of the Wound healing and Antibacterial Properties of Chitosan Bromelain and Gelatin-Bromelain Composite Nanofibres	Biology
11	Hwa Chong Institution	Behind the Rhythm	Mathematics
12	Hyogo Prefectural Takarazukakita High School	Development of a Solidified Rechargeable Cell Using Natural Polysaccharides	Chemistry
13	Jurong Secondary School	Fashion Waste Studies	Social Studies
14	Kamnoetvidya Science Academy	Prediction of new ultra-flexible boron oxide zeolites	Chemistry
15	Korea Science Academy of KAIST	Temperature-dependent Morphology Control of CU-Based Nanoparticles via Large-Scale Electrodeposition	Chemistry
16	Mahidol Wittayanusorn School	The development of saliva substitutes	Biology
17	Methodist Girls' School (Secondary)	Testing the Efficacy of Citrus Oils on Bacteria, in the context of Hand Sanitiser	Biology
18	Nan Chiau High School	Investigating the Effect of Biochar Made from Rice Waste on Soil Fertility	Biology;Chemistry
19	Nanyang Girls' High School	Surface modification of cellulose-based haemostatic sponge to improve surgical outcome	Biology
20	Nanyang Girls' High School	Synthesis of silver-coated magnetic iron oxide particles for methylene blue removal	Chemistry
21	Nanyang Girls' School	Evaluating the Reliability of AI in software quality assessment	
22	National Gifted Secondary School of Laos	Harvesting Electricity from Speed Bumps	Physics
23	National Junior College	Development of a microbial fuel cell with oxygen as an electron acceptor	Chemistry
24	National Junior College	Turning Corn Cobs into Water Cleaners: A Regenerable Cellulose Approach to remove Carbamazepine	Chemistry
25	National Junior College	Evaluating Escherichia coli's Antimicrobial Resistance Towards Ursolic Acid in Fermented Fruit Peels Over Two Generation	Biology
26	New Generation School of Preah Sisowath High School	Gene Therapy and the Role of Bacteriophages in Genetic Research	Biology
27	NUS High School of Math and Science	SEmuRAI: Development of a Software Emulation and Reversing AI Agent for Dynamic Binary Analysis (cs)	Computing
28	NUS High School of Math and Science	Bridge Recombinases facilitate large genome edits in muscular dystrophy	Computing;Biology
29	Philippine Science High School Main Campus	In Silico Screening of Pandanamine Isolated from Pandanus amaryllifolius and its Analogues as Potential Human Acetylcholinesterase Inhibitors	Chemistry
30	Raffles Girls' School	Lactobacillus as an effective treatment to ameliorate locomotive decline in Drosophila melanogaster model of Alzheimer's Disease	Biology
31	Raffles Institution	Asymmetric synthesis of ortho-substituted sulfoxide through ionic interactions	Chemistry
32	River Valley High School	Smart 12-lead Wearable for ECG Monitoring with IoT capabilities	Physics
33	School of Science and Technology, Singapore	Investigation of the rotational dynamics of the Milky Way by measuring its radial velocity through the hydrogen line using a parabolic grid diffraction	Physics
34	SMA Negeri 4 Denpasar	innovation to address health problems through moninga leaf powder	Biology;Mathematics;Computing
35	SMJK Chung Ling Pulau Pinang	Leaf Guard	Computing
36	St. Joseph's Institution	Investigating the effect of surface wettability on water evaporation rates.	Physics
37	Staples High School	Discovering Novel Targets for the FMN Riboswitch to Test the Utility of Computational RNA-folding Methods for Antibiotic Development	Biology
38	Taipei First Girls High School	Identification and Functional Analysis of Lipid Droplet Autophagy Receptors.	Biology
39	Taipei First Girls High School	Student2: Liquid-Liquid Phase Separation of C9orf72 Dipeptide Repeats related to ALS.	Chemistry
40	Taipei Municipal Chien Kuo High School	General Enzyme Activity Detection Platform Based on Metal-Organic Frameworks (MOFs)	Physics;Biology
41	Taipei Municipal Chien Kuo High School	Systematic study of the fluid-structure coupled oscillation in a partially filled container	Physics
42	Tallinn Secondary School of Science	Investigation of the aerodynamics of paper airplanes and the physical properties of HDPE	Chemistry;Physics
43	Tallinn Secondary School of Science	Improve the UV resistance and colour stability of post-consumer recycled plastic profiles	
44	Temasek Junior College	Mechanical Robotic Gripper Design for Food Handling	Physics
45	Temasek Junior College	Design and build a benchtop desalination unit based on capacitive desalination	Engineering, chemistry
46	Angkor Intellectual Academy	How can AI help in operating levers?	Physics
47	The Second High School Attached to Beijing Normal University, International Division	Optical Microcavity Sensing: Detection of Phosphate Buffered Saline Solutions at Various Concentrations Using a Microbubble Resonator In	
48	The Second High School Attached to Beijing Normal University, International Division	Aberration Strategies Across Focal Lengths: A Simulation-Based Study of Three Lens Types	Physics
49	Zhonghua Secondary School	The Rapunzel Project: An Experimental Study on the Effects of Selected Chemical Compounds on Hair Growth Rate	Biology
